

**Take care of yourself.
Take advantage of your
preventive care benefits.**

Regular preventive care can help you stay well, catch problems early on and may be potentially life saving. To support and surpass health care reform recommendations, Anthem's plans cover 100% of covered preventive care services¹ like screenings, immunizations and exams. If you visit in-network providers, you don't have to worry about any out-of-pocket costs for preventive care services. If you use an out-of-network provider, your deductible and out-of-network expenses may apply.

Here's an overview of the types of preventive services covered. Refer to your *Summary of Benefits* to learn more.

Preventive vs. diagnostic care

What's the difference? Preventive care is generally precautionary. For example, if your doctor recommends having a colonoscopy because of your age or family history, that's preventive care. But, if your doctor recommends a colonoscopy to investigate symptoms you're having, that's diagnostic care, and your plan cost share will apply.

Please note, the preventive care services below are not recommended for all individuals and appropriateness may be determined by the treating physician and recommendation guidelines.

Child Preventive Care (Birth to 18 years)

Preventive physical exams

Screening tests include:

- Vision screening²
- Hearing screening
